PROJECT DEVELOPMENT PHASE
(SPRINT CONTENTS)

Date	9 SEPTEMBER 2022
Team ID	PNT2022TMID12328
Project Name	Predicting the energy output of wind turbine based on weather condition

SPRINTS	CONTENT
Sprint-1	1. Data Collection • Download or Create Dataset 2. Data Pre-Processing Import Required Libraries Analyze The Datasets Splitting Data Into Independent And Dependent Variables
Sprint-2	3. Model Building • Choose the Appropriate Mode • Check The Metrics Of The Modell • Save the Model 4. API Integration • Generate Weather API Key
Sprint-3	5. Application Building • Flask App • Html pages • Testing
Sprint-4	6. Train The Model On IBM • Register For IBM Cloud • Train The ML Model On IBM • Integrate Flask With Scoring End Point
